SPECTACLE "ELEMENTS"

We never tire of celebrating Life and what better way to do it than by creating a Show that represents the elements of Nature without which we could not exist, creating an allegorical representation of each of them.

"Elements" is a Show that seeks a great visual impact thanks to the giant elements that make it up, as well as a constant interaction with the public and the figuration that accompanies them.

This Show is made up of FOUR gigantic Thrones that represent the four elements of Nature: Water, Fire, Earth and Air. Above each Throne is a Goddess, the core of power that each element contains.

There are two extras who escort the Goddesses, characterized according to the element they accompany and carrying different types of props with which they will interact with the audience.

Flying over the Thrones are THREE aerial balloons that represent three forms of energy necessary for Life to exist: electricity, the atom and a nebula.

With each aerial there are two extras, one in charge of handling it and another for support both dressed completely in black, in allegory to the black holes in which Life completely disappears.

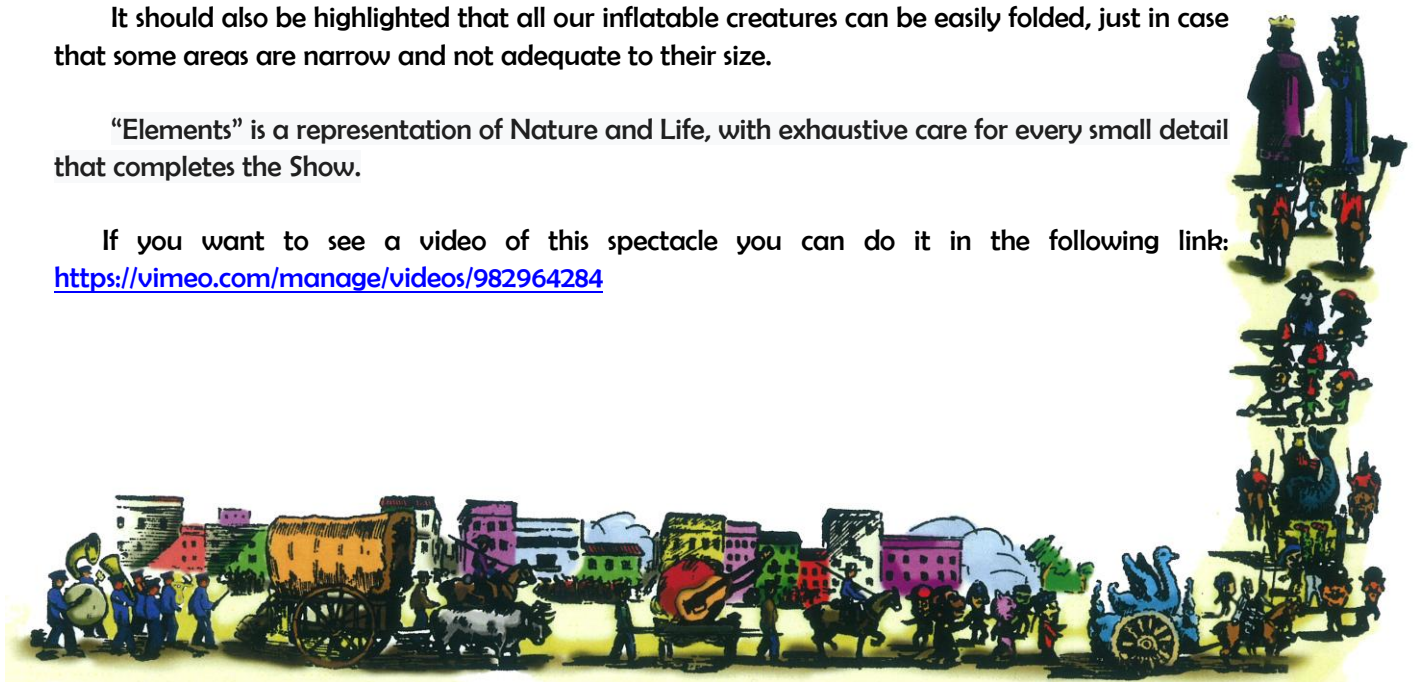

"Elements" incorporates an emitter and receiver sound system that plays the same soundtrack in each of the Thrones creating a surround sound that will take the audience to another reality.

It should also be highlighted that all our inflatable creatures can be easily folded, just in case that some areas are narrow and not adequate to their size.

"Elements" is a representation of Nature and Life, with exhaustive care for every small detail that completes the Show.

If you want to see a video of this spectacle you can do it in the following link:
