SPECTACLE

“FUTUR METAL”

This parade consists of five gigantic mythological and futuristic figures clad in metallic armour and breastplates. These figures are equipped with various special effects that will amaze and thrill the audience, such as smoke machines and laser beams. Accompanying the moving figures will be a group of Metal Warriors, who must control and confront the beasts with the help of the youngest participants in the parade. “Futur Metal” is a parade that will impress both for its scale and its innovative sound techniques, as it features a system of transmitters and receivers capable of producing sound, in addition to the individual sounds of each of its elements, the same lively soundtrack in unison across all of them, producing an immersive sound that will transport the audience into a new universe full of fantasy, dragons and beings from another reality. Other innovative effects featured in this parade include smoke machines and multicoloured laser beams, which further enhance this spectacular parade.

It is worth noting that, as these are inflatable figures mounted on motorised floats, they can be quickly and easily dismantled if necessary to pass through any area that is not suitable for their size.
