SPECTACLE

"JURASSIC LAND"

In this parade, five giant dinosaurs will wind their way through the streets, surrounded by a merry band of troglodytes or explorers who have travelled from ancient times and are amazed by all the new things they encounter along the way; they will attempt to hunt down the prehistoric creatures with the help of the audience.

The group of giant dinosaurs consists of: a Triceratops, a Brachiosaurus, a Werhosaurus, a mammoth and the ever-fearsome Tyrannosaurus rex. 'Jurassic World' is a parade that impresses both for its sheer size (each dinosaur measures between 5 and 9 metres) and for its innovative sound technology, as it features a system of transmitters and receivers capable of producing, not only the characteristic roar of each dinosaur, but also the same soundtrack in unison from each one, producing an immersive sound that will transport the audience into a prehistoric reality.

It is worth noting that, as these are inflatable figures mounted on motorised trolleys, they can be quickly and easily dismantled if necessary to pass through any area unsuitable for their size.
