SPECTACLE "NATURALIA"

The magic of enchanted tales comes to life on the streets of the Parade in the form of a gigantic Caterpillar, almost 20 metres long and 3 metres high, bursting with colour and highly mobile thanks to its articulated body. Equipped with twelve movable legs, our giant Caterpillar will make its way through the parade, filling it with light thanks to 'luminous warts' integrated into its body and a unique tail containing a powerful discharge lamp and eighteen small LED lights that gradually alternate their colours. The touch of realism comes from its large, movable eyelids, which will rise and fall, allowing this unique Caterpillar to interact more closely with the audience. This parade is a tribute to Nature, with the performers accompanying the Caterpillar depicting the most common forest creatures, but with a touch of fantasy that will set the imaginations of young and old alike alight. Equipped with jumping stilts and skates, these characters will amaze not only with their striking appearance and colourfulness, but also with their fun and acrobatic pirouettes.

A parade float with a unique design, which aims to surprise spectators not only with its size and great manoeuvrability (thanks to the tractor built into its head and the train of carriages it pulls), but also with its environmentalist ethos, which seeks to promote an interest in and care for nature in a different, fun and cheerful way. Equipped with a powerful sound system of over 1,500 W, the Giant Caterpillar will feature an integrated LED lighting system at the tips of its antennae, creating dramatic lighting in the performance area for the performers accompanying it – adding the finishing touch to a parade designed to leave no one indifferent.
