SPECTACLE

"SPACE"

Curiosity is innate in the human being, and from it are born investigations, challenges and great adventures, being one of the most outstanding in all areas the space exploration.

"SPACE" represents the search for new horizons, the illusion to reach the unknown and the impressive means that are used to achieve it. This Spectacle is composed of **FOUR air elements** with interior light: the Earth Planet (origin of space explorers), the spacecrafts Orion and Discovery and the Mars Planet (final destination of the expedition). A **gigantic Terrestrial Exploration Vehicle**, on a tractor with a platform both of them camouflaged and **four powerful lights** that will sweep through the sky, illuminating the air elements from the outside.

For complete the spectacle and have greater interaction with the public, there are **FOUR** extras characterized as **exploratory astronauts**. They have two 'sunlight balls', that they will throw to the public so that they help them to transport the 'sunlight balls' along the route.

The Terrestrial Exploration Vehicle has a powerful sound equipment that fills the streets with music, producing a different atmosphere which will make people immerse themselves in other dimension.

The air elements have inside it big helium-filled balloons thanks to those who can fly high.

"SPACE" is an INNOVATIVE show, which will impress both by its size as by its light effects and the realism of this elements.

To perform this show are necessary **THIRTEEN persons**: five porters of air elements, two extras to help the air elements, a driver for the terrestrial exploration vehicle, four extras and two coordinators.
